

**Opening Up America – Return to Patient Care Protocol
Based on CDC and State Recommendations**

- We will slowly be returning to see non-urgent patients in our office
- We will continue to limit visits of high-risk patients (>65 & immune-compromised) to urgent problems only.
- If you have any symptoms – fever, cough, please cancel your appt.
- Our facility will be wiped down with antiviral cleaners every hour.
- We will continue with telemed visits if your appointment doesn't require exam while insurances are covering them.
- We will not allow any additional people at your appointment unless necessary
- All patients are required to wear masks. We ask that you bring your own if available to preserve limited supplies
- We will have limited use of the waiting area and will bring patients directly back to rooms if possible. If waiting room needed we will keep seats spaced apart.
- We will have you wash hands and have temperature taken on arrival.
- We ask that you are conscious of social distancing when passing by other patients.
- We will not be doing outreach clinics at this time as we have a controlled environment in our Cody office that we can adhere to the above policies.
- Elective surgeries will be resumed as needed.
